SECURITY LEVEL: Low

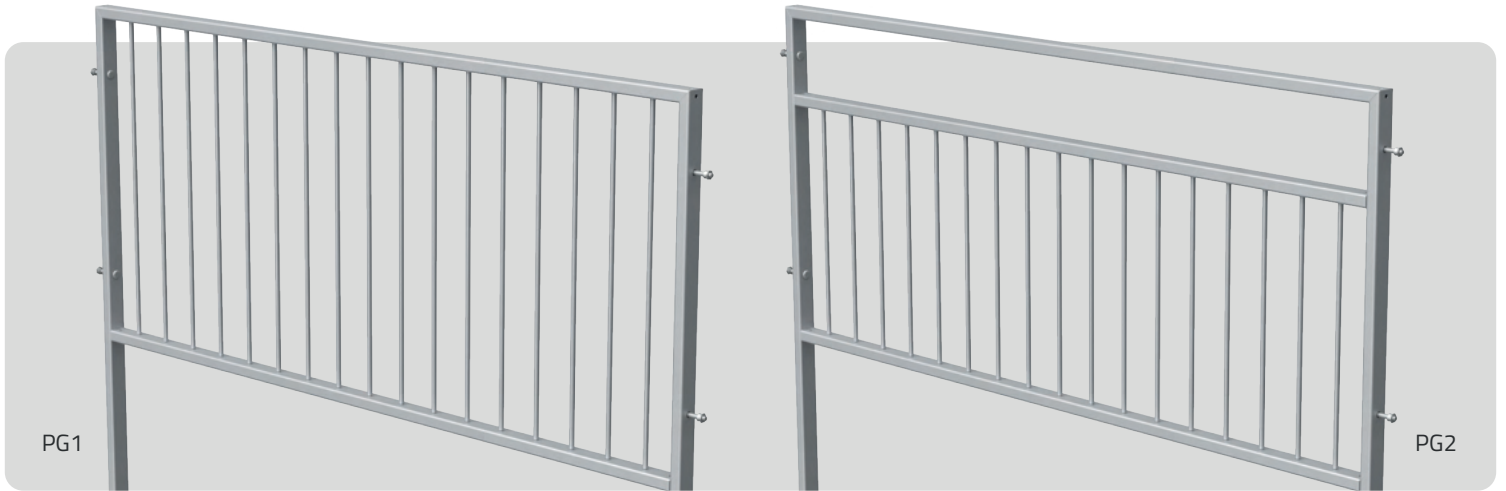

All Fastline® steel railing systems are manufactured in one of our UK factory facilities. This allows us to provide standard, BS compliant systems as well as enabling us to adapt bespoke systems to suit all requirements.

PG1 & PG2 Pedestrian Guardrail

Pedestrian Guardrail (PG1 & PG2), Panel Railing System

Our railing systems are the best available. In-house fabrication and quality control ensures top quality products at unbeatable prices. Our system is designed in accordance with Standards for Highways guidance and serves to provide the perfect demarcation of pedestrian walkways to vehicular highways.

Panels and Posts

The system allows for "stepping" to follow the topography of the site without any compromise in security or system rigidity and with no time consuming/ costly modification requirements on site. Our anti-tamper bolt through system allows for a natural stepping where required; even the most difficult of site conditions will not hamper the appearance or performance of the system.

Aesthetically pleasing, easy to install and security to meet almost all requirements.

System Finish:

Our fabricated products are hot dip galvanised to BS EN 10346:2015 and polyester powder coated to BS EN 13438:2013 to the RAL colour of your choice.

Designed in-house, Fastline® products are expertly fabricated in the UK in our principle factory to ensure we maintain full control over the quality and to allow us unbeatable service in the production and modification of the standard units if required.

All items undergo rigorous multi-stage inspections to ensure conformity to the above standards and contribute to our 10 year product guarantee.

This product can be provided to conform to the above standard please state this at the point of enquiry and our team will be more than happy to advise to ensure full compliance to any specification.

See separate **Terms & Conditions** for F10™ Guarantee compliance.
